## DETAILED ACTION

### Response to Arguments

1. Applicant's arguments filed on October 1<sup>st</sup>, 2010 have been fully considered but they are not persuasive. In reference to independent claims 8, 14 and 19, the applicant argues that the prior art does not teach second cooling fins that include a lower fin structure and a normal fin structure. The applicant's specification does not support this amended recitation. The applicant's specification does not recite a lower fin structure or a normal fin structure but rather recites a second cooling fins 130 that includes a lower portion as recited in the amended specification filed on August 20th, 2003.

### Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims **8, 10-23 and 25-27** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims contain subject matter specifically, **“the second cooling fins include a lower fin structure and a normal fin structure”** which is not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had position of the claimed invention. The applicant's specification does not support this amended recitation. The applicant's specification

does not recite a lower fin structure or a normal fin structure but rather recites a the second cooling fins 130 that includes a lower portion as recited in the amended specification filed on August 20th, 2003.

### **Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
